## Rangat 2K25: A Night of Culture & Celebration at Adani University

Adani University lit up with colors and culture during Rangat 2K25. The Navratri celebration featured a vibrant Garba night where students danced with joy and energy. Traditional attire, music, and spirited performances created a festive atmosphere. Highlights included creative costume contest honoring standout participants in both male and female categories. The event beautifully blended tradition with youthful creativity, uniting the AU community in celebration and leaving behind cherished memories of togetherness and cultural pride.

## Expert Session on Wind Energy and Sustainable Power Innovations

Career Development Cell had organized an expert session under the initiative 'Gateway to Adani CEO Series'. Mr. Milind Kulkarni (CEO-Adani Wind) graced the session as an expert. He explained why turbines are an engineering marvel and what it takes to build the entire ecosystem, discussing topics from land acquisition to grid management and talent retention. The session touched on wind energy principles, where turbines capture around 50% of wind energy, and technologies like doubly fed induction generators, gearboxes, and automated control systems. Hybrid systems, manufacturing processes, and India's wind sector history were also highlighted, offering insights into sustainable energy innovations and commercial viability.

## Even on the Pitch the Worst Product

The Marketing Mavericks Club of AU organized the 'Pitch the Worst Product' Challenge. The event witnessed enthusiastic participation from students across disciplines. Each team had to creatively present their assigned worst product as if it was an innovative solution that every consumer needed. The challenge did not only showcase students' wit and originality but also deepened their knowledge of how brands create awareness of their products, build value and influence the purchase decisions of the consumers.

## Power Down Challenge Inspires Sustainable Thinking

Joule's Club of AU organized the Power Down Challenge. The event saw active participation from students across all disciplines, who explored the campus to identify instances of electricity wastage. Teams then presented their findings through consulting-style PPTs, proposing practical process improvements and creative interventions. The competition transformed everyday life on campus into opportunities for innovation, inspiring students to think critically, act responsibly, and contribute towards a more energy-conscious and sustainable university community.
