Expert Talk on

Unlocking Human Potential: Enhancing Health Span

Dr. Pankaj Singh and Dr. Tulsi Mahadevia delivered an expert talk at Adani University on "Unlocking Human Potential: Enhancing Health Span." They emphasized the importance of helping individuals to realize their full capabilities in thinking, feeling, socializing, and maintaining health. Dr. Mahadevia highlighted the link between good health, happiness, and longevity, noting that physical health, mental well-being, and social connections contribute to a fulfilling life. Advances in healthcare and technology extend our lifespan, allowing for personal growth and societal contributions, creating a cycle of innovation and well-being.

Workshop on

Building Sector and Net Zero 2070

A workshop on 'Building Sector and Net Zero 2070' was conducted at IIM Ahmedabad jointly sponsored with the National Investment and Infrastructure Fund. The event was attended by Prof. Anupam Kumar Singh, Dean Academics, FEST and Dr. Vidya G. Mohan, Research Scientist, FMS. The event aimed to promote an open discussion among the policymakers, industry leaders, academia and researchers to address key questions such as how the building sector in India can contribute to NZ 2070, the role of green building rating programs, and the necessary policy priorities for achieving these ambitious targets.

Quizastra

A Thrilling Competition in Economics and Policy

The Faculty of Management Sciences recently hosted Quizastra, an engaging quiz competition featuring 25 teams. Focused on Economics and Policy, particularly current issues in the infrastructure sector. The event challenged participants to think critically and work collaboratively. After two intense rounds, seven teams advanced to the finals. Ultimately, one team emerged as the champion, while two others were honored as runners-up. Quizastra not only emphasized the significance of economic understanding but also fostered teamwork among participants, making it a rewarding experience for all involved.
