

Recognition @ Stanford University's Prestigious List of Top 2% Global Scientists

Adani University Congratulates Prof. Dr. Sunil Jha (Dean Research & Faculty of Sciences), and Dr. Biswajeet Day (Electrical Engineering) on being recognized in Stanford University's prestigious list of Top 2% Scientists Globally! Prof. Dr. Jha has been distinguished as one of the Top 2% Scientists Worldwide, in three categories (i) Artificial Intelligence & Image Processing, (ii) Analytical Chemistry, and (iii) Information & Communication Technologies. Dr. Day has been recognized in Energy, Artificial Intelligence & Image Processing, and Enabling & Strategic Technologies domain. This acknowledgement is a result of their hard work and significant achievements. Congratulations on this global recognition! Your accomplishments fill us with great pride.

Visit of Director of CSIR-CRRI: Emphasis on Strengthening collaborations in research and innovation

Adani University welcomed Prof. Manoranjan Parida, Director of CSIR-Central Road Research Institute (CRRI), New Delhi, to strengthen collaborations in research and innovation. During his visit, Provost, Deans, and faculty members engaged in interactive discussions on CSIR's initiatives and its role in advancing scientific research in India. The discussion topics included research partnerships and student opportunities in CSIR projects and internships. This visit enhanced the academic community's understanding of CSIR's impactful work and laid the foundation for future collaborations, fostering innovative projects and driving meaningful research efforts between the two institutions.

An Expert Session on 'Implementation Challenges of Integrated Township Policy'

Mr. Amit Motiwala, General Manager, Project Management Office, Adani Realty, delivered an expert session on 'Implementation Challenges of Integrated Township Policy' to the MBA (Infrastructure Management) students specializing in Real Estate Policy Management & Economics course. Mr. Motiwala addressed the practical challenges of implementing the Integrated Township Policy particularly focusing on the complexities of legislative clearances and adapting to evolving regulations, such as GDCR, FSI, Jantri rates, and TP scheme implementation. He also highlighted the effects of a township project like Shantigram on the market dynamics of Ahmedabad.

MBA Students Visit Shantigram Township for Insights into Sustainable Urban Living

MBA students of the Real Estate Economics and Policy course visited Shantigram Township, gaining insights into sustainable urban living. They explored key infrastructure, including the Water Treatment Plant, which ensures clean potable water from the Narmada canal, and the Sewerage Treatment Plant (STP), which recycles wastewater for landscaping and non-potable uses under a Zero Liquid Discharge (ZLD) system. The township's waste management converts kitchen waste into compost and handles dry waste sustainably. Additionally, the advanced security system ensures round-the-clock safety. The visit provided students with valuable practical knowledge of township infrastructure management.
